

LiveBottom *Falcon*

LiveBottom FEATURES

- 42" wide belt. No slats to break, bend or wear. Unloads in 1/2 revolution of belt.
- Bolt in easy to adjust and replace flashing covers
- Lightest in the industry. Optional aluminum bogie gains even more weight reduction.
- One trailer does it all - hot mix asphalt, sand, gravel, recycled material, low slump concrete, aggregates small and large, and more

Efficient Etnyre *Falcon* Live Bottom Trailers

- **Hauling Versatility**

Hot mix asphalt, sand, gravel, recycled materials, low slump concrete, aggregates small and large. – one trailer does it all.

- **Wide Conveyor**

42" wide belt. No slats to break, bend, or wear. Wider conveyor reduces material bridging. Unloads in 1/2 revolution of the belt.

- **Improved Twin Product Doors**

Eliminates segregation, allows load to discharge in a mass, allows operator to view position of the load. Flashing on outside of door out of discharge.

- **Lighter Empty Weight**

Lightest in the industry. Larger payloads every load.

- **Steeper Side Walls**

Prevents sticky material from bridging.

- **Limited Crossmembers**

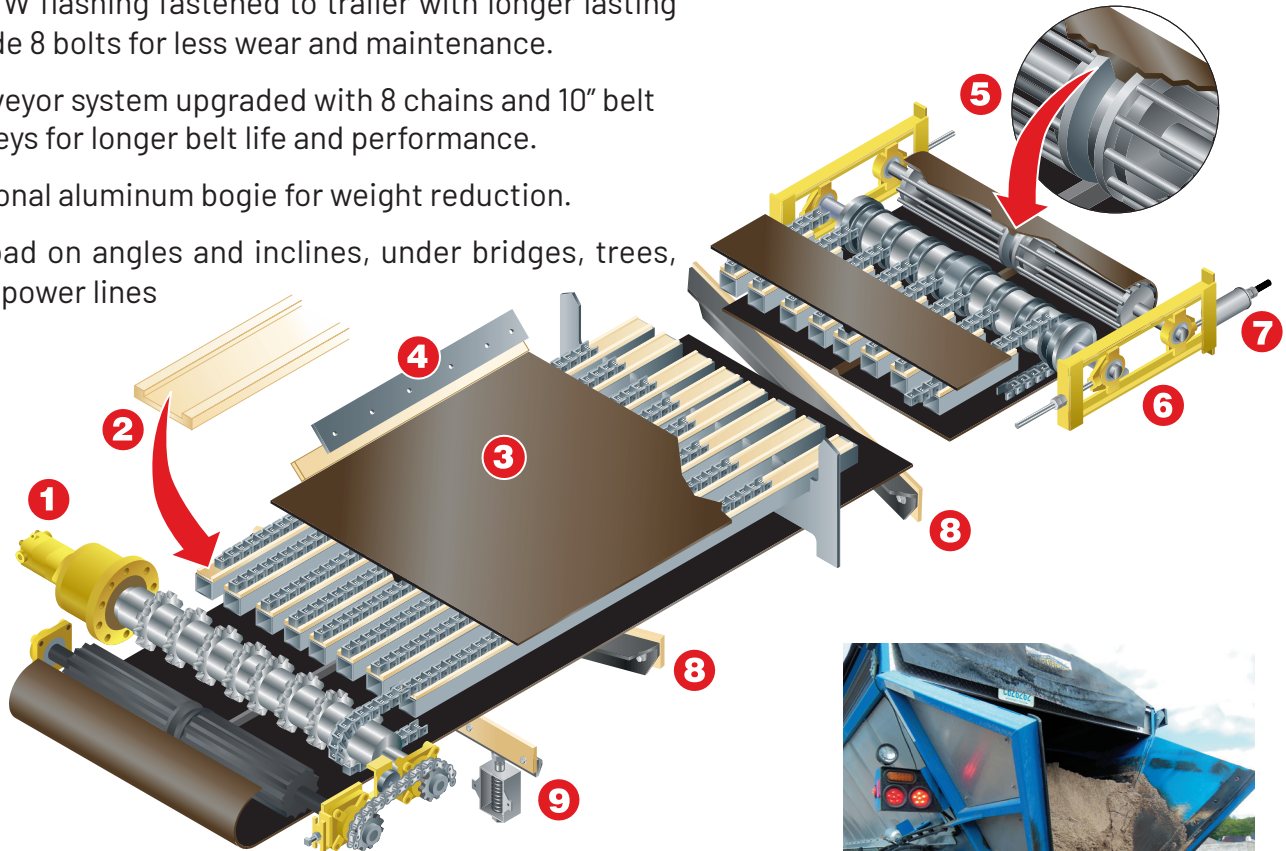

Controlled discharge

Polymer Mixes • Superpave • Millings • Micro Surfacing • Chipseal • Sand • Gravel

- UHMW flashing fastened to trailer with longer lasting grade 8 bolts for less wear and maintenance.
- Conveyor system upgraded with 8 chains and 10" belt pulleys for longer belt life and performance.
- Optional aluminum bogie for weight reduction.
- Unload on angles and inclines, under bridges, trees, and power lines

1. Direct hydraulic drive with 30:1 gear reducer. 130,000 inch pounds of torque. More power to unload difficult materials faster.
2. Chain guides made of ultra high molecular polyethylene. Eliminates the need for lubrication. Better support with 8 chain system directly supported by conveyor frame.
3. Composite belt, chemical and heat resistant.
4. Bolt in easy to adjust and replace flashing covers.
5. Positive, full length belt centering.
6. Separate tension adjustments for the belt and the chains.
7. Belt tension gauge.
8. Belt scrapers.
9. Spring loaded belt scraper.

Save time unloading under obstacles.

Haul larger payloads and unload faster with the industry's leading design.
