

Mastic Kettle

- Indirect Fire Heating System with turbulent heat chamber for even, consistent material temperatures
- Precision-tuned burner delivers exceptional fuel efficiency
- Full Turbo Wrap insulation (sides, bottom, and top) for superior heat retention
- Cool-to-the-touch exterior enhances operator safety
- Dual thermostat safety system monitors both material and plate temperatures
- Heavy-duty dual-sided auger with directional control for powerful mixing and discharge
- Gear-reduced drive system
- Designed for maximum efficiency, reliability, and ease of operation
- Built to deliver consistent performance, reduced fuel costs, and safer operation
- Intuitive color display interface with automated controls
- Strategically placed baffles & exhaust routing ensure maximum heat transfer efficiency

Approved by Maxwell Products to melt and apply GAP Mastic and GAP Patch materials.
